Work description.

Inspector: Victor Altamirano

Date: 040612

Weather: Sunny / 54 deg.

Field Work –

Today we hauled the last strand of the 137 strands. I verified twist on strand 137-north. No twist observed. Workers from the tower began dismantling the cable system and wheeling winch line at side span.

I observed that strand 136 on the south side span, wires need to be chased down from the south tower saddle.

Office work: Worked on diaries.
